

E-BIKE CHARGING STAND INFORMATION SHEET

E-Bike Charging Stand

European e-bike sales have grown more than tenfold annually since 2009 and investing in E-Bike Charging Stands is a smart way to future-proof your facilities.

Designed and built for e-bike cyclists, this stand offers riders an easily identifiable place to stop and securely charge their electric bikes.

The E-Bike Charging Stand features two IP66 weatherproof sockets, allowing two cyclists to charge simultaneously.

Its weatherproof design also means it can be installed both indoor and outdoors across various environments.

You can also lock the charging stand as you charge to stop the risk of e-bike charger theft.
