

## Equilibrium Cycle Stand Information Sheet

### Equilibrium Cycle Stand

Our Equilibrium cycle stand was developed as a high specification alternative to the conventional Sheffield cycle hoop. Designed to securely support a bike's saddle without frame to stand contact, this cycle stand presents an attractive horizontal parking solution, for even the most passionate cyclists.

With no restrictions on tyre width or mudguard size stemming from the channel free, horizontal parking position, these stands are the ideal solution for all bikes.

The Equilibrium Stand also pairs perfectly with our end of trip products.

### Specification

- Polyester powder-coated finish
- Heavy-duty welded CHS construction
- Designed for fixing to concrete as standard, specialised fixings can be used for screen, resin and waterproofing.
- Optional electric charging point can be integrated within the design of the unit
- 750mm centres or larger is recommended
- Rubberised saddle-rest spigots allow for bike support without the traditional frame to stand contact
- Bespoke made to suit your requirements
- Full design consultation provided
- Made in Britain
