

SEMI VERTICAL AMAZON ECO SHELTER INFORMATION SHEET

Semi Vertical Amazon Eco Shelter

This environmentally conscious shelter enables you to capitalise on the benefits of the Amazon Eco range even when space is at a premium.

By storing cycles semi-vertically, you drastically reduce the footprint required for your shelter: allowing high-volume secure storage in a limited area.

All of our Amazon Eco range is clad with FSC-certified timber, so you can be confident that your shelter contributes to sustainable forestry.

As this model is made-to-order, our team can design your shelter to meet the exact needs of your site - including with or without gates.

Locking systems include: swing-gate digi locks, access control systems, sliding gate code locks and padlock latches.

With various optional extras, including sedum roofing, we can comfortably create a high-security shelter tailored to your requirements.

Specification

- Selection of hard and softwood timbers
- Variety of lock options
- Sedum roofing available
- PIR lighting available
- High security mesh gating option
- Galvanised steel Semi Vertical Cycle Racks
- Powder coating option
- 10-year warranty
