

CAMDEN LOCKER

Provide Commuters with a Convenient Storage Solution

The Camden Locker has been designed to meet the rising demand for End of Trip storage in workplaces, schools, and leisure facilities. With cycling and active commuting becoming the standard across London and the UK, providing secure, practical storage is essential for sustainable travel. Manufactured from durable materials with a wide range of finish options, the Camden Locker is functional and stylish. Available in multiple configurations, including 2-door (as standard) and 3-door options, with a choice of mechanical or electronic locking systems, this versatile locker can be adapted to suit the specific requirements of your project. Ideal for architects and contractors specifying bike storage solutions, the Camden Locker delivers secure storage for clothing, shoes, and accessories, enhancing the value and usability of changing areas while keeping spaces organised and professional.

- > **Hanging Storage:** 2 clothes rails as standard

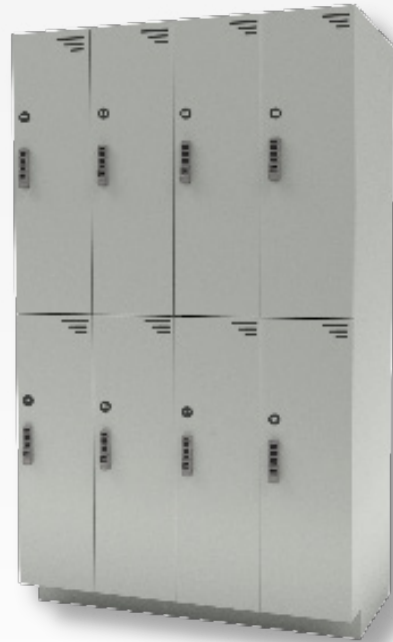

CAMDEN LOCKER

The Camden Locker goes beyond typical storage. We designed this locker to support the growing demand for active commuting projects, ensuring end users have a convenient, safe space for their belongings. This locker provides a flexible, specification-ready solution that can be tailored to suit any project's design, security requirements, and space constraints.

Customisation that Works for You

Every site is different which is why this locker is built to adapt:

- › 300mm (W) x 2000mm (H) x 500/600mm (D)
Standard dimensions
- › **Two-door (as standard)**, three door or Z-door configurations available
- › You can choose from MFC or PPC aluminium for the carcass, and HPL, MDF (high-pressure laminated), or SGL for the doors.
- › Optional ventilated doors and rear panels
- › Moisture-resistant base for wet areas
- › Wider range of premium laminates and RAL colour finishes

PROJECT

225 City Road, London

At 225 City Road, we delivered a complete cycle storage and End of Trip facility to support active commuting within The Arc, a new residential and commercial tower in East London. Alongside high-capacity cycle parking, the project placed emphasis on providing practical, secure, and comfortable facilities for residents and commuters.

A key part of this installation was the inclusion of Camden Clothing Lockers, designed to offer secure and convenient storage for those traveling by bike or on foot. Their ventilated design helps manage moisture build-up, while multiple locking options provide flexibility for different users. Together with Westminster Clothing Lockers, these lockers ensure that commuters have reliable spaces to store belongings, change, and transition smoothly between their journey and work or home life.

The project goes beyond functionality by combining high-quality cycle storage with well-thought-out End of Trip facilities to enhance the overall user experience. The lockers complement the wider storage systems, from gas-assisted two-tier racks to folding bike lockers and maintenance stations, by providing the finishing touch that makes active commuting more practical, secure, and enjoyable.
