

6/8 Space Original Cycle Shelter Information Sheet

6/8 Space Original Cycle Shelter

The original cycle shelter is our most popular and this storage solution is the smaller version, ideal when only limited storage is required. Accommodating six or eight bikes, it's a cost effective and secure option for a range of applications. Our original shelter is a popular choice for all public buildings, schools, offices and housing developments.

As standard, the original cycle shelter includes either 3 or 4 hot-dipped galvanised hoop toastracks. Option to upgrade to individual Sheffield Hoops with above or underground fixings.

Secure and convenient, cyclists will recognise the product and be able to lock their bikes up with ease.

Specification
