

## WESTMINSTER CLOTHING LOCKER

Premium End of Trip Clothing Lockers for Active Workspaces

High-quality End of Trip facilities are required as the demand for active commuting rises. The Westminster Locker has been designed to combine durability, premium finishes, and functional storage, making it the ideal solution for changing rooms, commercial fit-outs, and cycling facilities across the UK. With customisable options, premium timbers, and a wide selection of mechanical and electronic locks, these lockers enhance user experience while delivering a clutter-free, specification-ready solution and featuring a generous 600mm depth comfortably storing coats, dresses, and cycling gear. At the same time, the integrated hardwood bench provides a functional, space-saving solution for changing areas. Offered in bespoke finishes and equipped with a full range of locking systems, this locker delivers a high-end user experience while ensuring durability in high-traffic environments.

- > **Premium Doors:** High-pressure laminated MDF or SGL doors in a wide range of finishes
- > **Integrated Bench:** Hardwood bench available in a choice of premium timbers
- > **Flexible Locking:** Mechanical cam locks, padlocks, digital keypad locks, and RFID systems
- > **Dimensions:** 300mm W x 2000mm H x 600mm D, with generous depth for coats and suits
- > **Custom Options:** Ventilated doors, perforations, numbering, and optional shoe compartments
- > **Durable Build:** Moisture-resistant base and carcass in MFC or aluminium powder-coated steel
- > **Made to Order:** Bespoke sizes, finishes, and layouts available to suit project requirements
- > **Ventilation:** Front, rear, or door perforation options for air circulation
- > **Proudly Made in Britain**

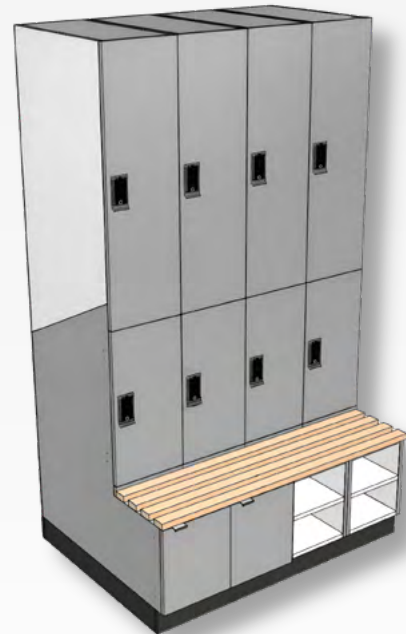

# WESTMINSTER CLOTHING LOCKER

The Westminster Locker offers architects a fully detailed, specification-ready solution. This locker combines robust construction with premium design and is customisable in various finishes and locking systems. It is a trusted choice for UK commercial offices, gyms, and residential cycle hubs.

## Customisation that Works for You

Every site is different which is why this locker is built to adapt:

- › 18mm high-pressure laminated doors in either MDF or SGL and with a wide range of finishes
- › MFC or PPC aluminium carcass options, with optional matching laminate end panels
- › Integrated hardwood bench in a choice of premium timbers
- › Optional ventilated doors and/or rear panels
- › Cam locks, padlocks, KitLock, DigiLock, RFID (Ojmar OCS Pro, Pulse, Smart) locking options
- › 300mm W x 2000mm H x 600mm D standard dimensions
- › 2 x clothes compartments (973mm H x 576mm D x 264mm W), optional shoe unit

Z doors are an optional configuration, not standard

# PROJECT

## Queens Quay, Bristol

Our latest collaboration at Queens Quay, Bristol, showcases how integrated, high-quality cycle storage can transform a modern office environment. By supporting active travel and promoting a healthy lifestyle, these facilities complement the building's sustainability and design ambitions, creating a seamless experience for everyday commuters. Queens Quay results from a £5.6m refurbishment and reconfiguration of a four-storey office building in the heart of Bristol, led by AWW Architects. The project prioritised open, light-filled spaces, upgraded wellness amenities, and strong sustainability credentials, including BREEAM Excellent and Wired Score Platinum. A key aspect of the brief was encouraging active travel, with the reception extended to include new showers, changing rooms, and basement cycle storage, establishing a comprehensive suite of End of Trip facilities for tenants.

Working closely with the client and architect, we supplied and installed a tailored suite of British-made, BREEAM-compliant products, all carefully colour-matched to complement the building's modern aesthetic. Central to these facilities were the Westminster Lockers, moisture-resistant MDF core units with high-pressure laminate finishes, designed for compact Z-locker configurations. Each locker features integrated hanging rails and heavy-duty Blum hinges for long-term durability, while the laminates were selected to harmonise with the interior design palette. These lockers offer tenants a secure, practical, and stylish storage solution, demonstrating how thoughtfully designed storage can enhance the End of Trip experience.
