

Clothes Steaming Locker Information Sheet

Clothes Steaming Locker

Keep clothes fresh and free of creases with our convenient Clothes Steaming Locker, a must have item for any premium end of journey facilities.

The unit includes a securely integrated steamer system and a convenient bracket that enables users to safely store the steamer head between uses.

To use the steamer, simply fill the reservoir with water, wait 30 seconds for it to reach the requisite temperature and apply to the garment; the steamer also has a built-in safety timer to reduce the risk of fire hazards.

With an integrated clothing rail and handy shelves, this locker has been designed to provide a safe and simple user experience. Add value and a luxurious feel to any end of journey area.
